Enginedered Texturing Systems
The BRICKFORM system of Texture Mats has introduced a whole new level of creative expression to decorative concrete. Precision engineered tools make possible a high degree of controlled creativity, making it possible to mimic and even enhance the look and feel of natural stone and many other surfaces. From finely tooled slate to perfectly set cobbles, BRICKFORM has the tools to make it happen, with absolute control.

Largest Selection and Best Value
Pattern
BRICKFORM manufactures the world’s largest selection. Over 175 patterns, in stone, slate, brick, and even wood textures are available.

Texture
Over 30 textures have been designed to recreate the look and feel of natural materials. All tools, including random fieldstone, coarse wire-cut brick, heavily textured stone, and Mexican tile, are created with strict attention to detail.

Precision and Durability
The resilient material used to create each texture is designed to retain pattern “memory.” Consistent, well-defined, uniform texture is transferred, in every detail, onto the concrete surface imprint after imprint.

Our company is dedicated to the precise and unsurpassed consistency of each and every texturing tool. Strict standards are maintained so every tool is tight-fitting, reducing pattern lines and unsightly ridges.

Each tool is crafted from a high-quality polyurethane material that is flexible, yet retains high-tear strength. Sturdy handles are carefully placed according to tool-weight distribution to improve balance and maneuverability.

Made-to-Order tools designated may require a 2-week production lead time.

Disclaimer - All measurements are nominal. Skin and texture mat measurements are based on the Brickform mold size. Urethane has a natural tendency to shrink or expand, depending on environmental factors. This does not affect how the mats fit together.

Slate Texture Mats

Slate is a sleek, metamorphic rock with fine veining patterns. The grain pattern of slate makes it a common resource for tile flooring because it is easily split into thin sheets. BRICKFORM slate texture tools recreate the elegant, clean design of slate without the expense and hassle of installing fragile natural stones. BRICKFORM Ashlar texture mats reflect the handcrafted, intricately-fitting stones of historic Ashlar configurations.

Ultra Liners

Urethane Ultra-Liners

The next generation in cantilever bullnose forms is the Brickform Urethane Ultra-Liner. The new liner has been re-engineered from the ground up to give the Brickform contractor a competitive edge when it comes to step faces, wall caps, counter tops and pool copings.

- Made with a durable and dependable urethane system that will let you use them time and time again with the same quality results as the first use.
- Straight or curving around corners, these liners maintain their shape on even some of the sharpest turns.
- Solid urethane skin is rigid and strong without distortion, while a light-weight, high-density core keeps these forms flexible to contour to almost any shape.
- Non-porous face will not draw out moisture from your concrete and will leave a smoother face, reducing your finishing time.
